SAASY INC. PROPOSAL

## The SaaS Landscape

When you think software, you likely think of something you buy and install yourself. But, SaaS—or software as a service, has changed the game in recent years.

The SaaS landscape is a crowded one—full of countless options and a long list of features and benefits the layperson doesn't always grasp right away.

And working with the wrong company could mean you and your employees are stuck teaching yourselves how to use the new platform—which can sometimes feel like a whole new language.

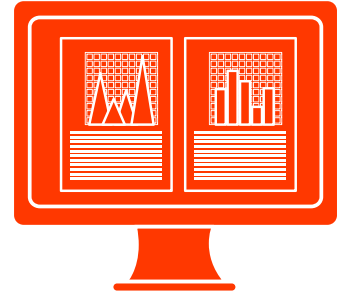

So, while you can certainly select a plan and get started with our tool, you'll gain a significant advantage by working with us to incorporate the technology into your system in a way that delivers the best results.

See, keeping up with the latest tech isn't always easy. You've got employees to manage, emails to answer, and a sprawling set of business goals.

With that in mind, there's a good chance that you could benefit from a little automation—and in-depth training that shows you how to use your new tool.

## How we can help

See, keeping up with the latest tech isn't always easy. You've got employees to manage, emails to answer, and a sprawling set of business goals.

With that in mind, there's a good chance that you could benefit from a little automation—and in-depth training that shows you how to use your new tool.

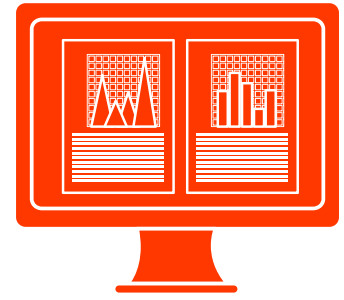

Our team offers custom solutions, implementation training, and ongoing support, so you'll be able to get the most out of your software.

We'll work together to come up with a strategy—that covers training, account set-up, cloud-storage solutions, data importing, and more. The plan will be executed across a predetermined timeline—with benchmarks representing successful completion of each milestone.

We know that enterprise software is a big investment but working with us means you're gaining our 20+ years of expertise, and a scalable solution designed to make things easier as you gear up for growth.
